### FUND DESCRIPTION

The Vetiva Banking ETF "VETBANK ETF" is an open-ended Exchange Traded Fund managed by Vetiva Fund Managers Limited. The VETBANK ETF is designed to track the performance of the constituent companies of the NGX BANKING Index and to replicate the price and yield performance of the Index.

### INDEX DESCRIPTION

The NGX BANKING Index comprises of the top 10 banks listed on the Nigerian Exchange Group ("NGX") in terms of market capitalization and liquidity and is a price index weighted by adjusted market capitalization.

### MARKET REVIEW & OUTLOOK

The Banking index lost 6.56% m/m in June, underperforming the ASI by 435bps due to further sell-offs across the sector and the broad share index. Following the Monetary Policy Committee meeting where the benchmark rate was raised by 150bps, investors exited the market in favour of fixed income securities. Investor sentiment was weak for the majority of the period and the sector's YTD performance entered the red for the first time this year.

This month, we expect Tier-II banks to release Half-year results. This should lead to cherry-picking action, while investors may continue to choose a wait and see approach due to the varied fortunes of banks so far this year. With Fixed Income yields on the rise, we foresee further sell-offs in the equity space, which may be further exacerbated by half-year results.
