### FUND DESCRIPTION

The Vetiva Industrial ETF "VETIND ETF" is an open-ended Exchange Traded Fund managed by Vetiva Fund Managers Limited. The VETIND ETF is designed to track the performance of the constituent companies of the NGX Industrial Index and to replicate the price and yield performance of the Index.

### INDEX DESCRIPTION

The NGX Industrial Index comprises of the top 10 companies in the Industrial sector listed on the Nigerian Exchange Group ("NGX") in terms of market capitalization and liquidity and is a price index weighted by adjusted market capitalization.

### MARKET REVIEW & OUTLOOK

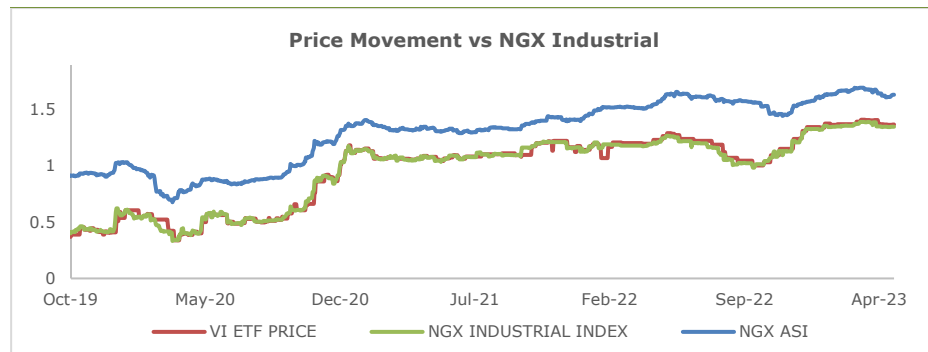

In April 2023, the All-Share Index lost 3.09%(m/m), this trickled down to the Industrial Goods sector, recording -3.98% (m/m) bringing its year-to-date performance to 6.05%. Whilst companies across major sectors on the exchange appeared to withstand economic shocks and turned in largely positive earnings releases in Q1 2023, the industrial goods companies had their earnings constrained by the cash crunch and higher production costs. In terms of individual companies, DANGCEM and BUACEMENT are the most capitalized companies in the NGX Industrial Index, with the 2 companies accounting for over 93.10% of the total weights.

We anticipate a positive performance for the market in May as investors react to the ongoing markdown of stock prices which presents attractive entry opportunities. We also note expected political activity in the month could drive market movements. In conclusion, we expect a broadly positive market performance during the month of May.
