**Fund Manager's Report**  
**For the year ended 31 December 2024**

The Fund Manager presents its report on the affairs of Vetiva Industrial Exchange Traded Fund ("the Fund") together with the financial statements and auditor's report for the period ended 31 December 2024.

**BACKGROUND INFORMATION**

The Vetiva Industrial Exchange Traded Fund ("the Fund") is an open-ended exchange traded fund established in July 2015 and registered with the Securities and Exchange Commission ("SEC"). The underlying objective of the Fund is to enable unit holders to obtain market exposure to the constituent companies of the NGX Industrial Index in an easily tradable form, as listed ETF securities are traded on the floors of the Nigerian Exchange Group (NGX), or any other licensed exchange on which the Fund may be listed subsequently. The Fund aims to replicate, as practicably as possible, the price and yield performance of the NGX Industrial Index.

The Fund invests its assets in the portfolio of securities that comprise the NGX Industrial Index.

The NGX Industrial Index is managed by the NGX and was created to provide an investable benchmark to capture the performance of the Industrial sector of the equities market. This index comprises the most capitalized and liquid companies in building materials, electronic and electrical products, and packaging industries in Nigeria.

The Index is rebalanced semi-annually. Accordingly, the Fund components and weights are subject to a semi-annual rebalancing.

**OPERATING RESULTS**

In thousands of Naira	12 months 31-Dec-24	12 months 31-Dec-23
Profit/(Loss) before tax	12,632,618	6,470,766

<b>Profit/(Loss) for the year</b>	<b>11,260,168</b>	<b>5,480,557</b>
Earnings/(Loss) per unit (kobo)	329	21

**NIGERIAN MACROECONOMIC REVIEW AND OUTLOOK:****Real Economy:**

Since January 2023, Nigeria's Purchasing Managers' Index (PMI) readings revealed 6 months of expansion and 16 months of weaknesses. This can be attributed to higher energy prices and exchange rate depreciation. Sectoral breakdowns show that the services sector was the most resilient, expanding for 15 months over the past 22 months. The agricultural sector expanded for 11 months over the same period, while the industrial sector recorded only 4 incidents of expansion.

Despite the underwhelming PMI outcome, real sector output has shown signs of resilience. According to data from the National Bureau of Statistics, Nigeria has recorded higher real output growth in recent times than the prepandemic era (2014 – 2019). While real sector growth in the Nigerian economy averaged 2.0% y/y between 2014 and 2019, growth averaged 3.3% in the post-pandemic era (i.e., between Q2 '21 and Q3 '24)

The recent outperformance in real output growth can be attributed to the Services sector. The sector has been responsible for 90% of the overall output growth since 2021. Two sub-sectors are responsible – the Financial Services and Information & Communications (ICT) sectors.

**Real Economy (Contd.)**

The Financial Services sector has recorded double-digit growth of incremental proportions for 4 consecutive years on the strength of a resilient industry balance sheet. While the sector could grow by 32.4% y/y in 2024, we expect a modest 22.4% y/y growth in 2025. Conversely, growth in the ICT sector has remained in the single-digit region since 2021, due to regulatory restrictions in ensuring the identities of mobile subscribers are linked to their National Identification Numbers (NIN). According to the National Communications Commission, the linking exercise was completed as of October 2024. Nevertheless, we expect growth in ICT to slow from an expected 5.6% y/y expansion in 2024 to 4.7% y/y in 2025, amid normalization in economic activities past the pandemic-induced surge in telecoms subscriptions. Nevertheless, we note disruptive technologies could provide catalysts for growth over the medium term.

The Industrial Sector has performed poorly over the past decade, with its contribution to growth slipping from 1.7% in 2014 to 0.1% in 2023. Due to the rebound in oil production, the contribution of the sector to growth could improve by 40bps to 0.5% in 2024 and 0.6% in 2025. We estimate that in 2025, the Industrial sector could record its highest growth outturn in 11 years due to the pick-up in both oil production and oil refining.

In November 2024, oil production (including condensates) improved to a new 2-year high of 1.69 million barrels/day (mb/d). Thus, we expect the oil sector to expand by 5.2% y/y and 5.4% y/y in 2024 and 2025 respectively. According to the Nigerian Upstream Petroleum Regulatory Commission (NUPRC), oil production (including condensates) hit a peak of 1.8 mb/d in November 2024 with a low of 1.6 mb/d. We hinge our 2025 expectations on an average oil production of 1.65 mb/d (2024E: 1.55 mb/d). Concerning refining, we have observed a sustained contraction despite the build-up in Nigeria's refining capacity. Nevertheless, we expect oil refining to recover from an 8-year recession in 2025, as the Dangote Refinery ramps up production. Thus, we pen down a 751% y/y expansion in 2025 (2024E: -34.3% y/y). Thus, the contribution of refining to overall growth could rise to 0.4% in 2025. Overall, we expect a 3.54% y/y expansion in the Industrial Sector (2024E: 2.78% y/y).

Growth in the agricultural sector has slowed to 1.47% y/y in the first nine months of 2024 (9M'23: 1.65% y/y). This is the weakest outturn since the rebasing of the GDP. We attribute this to insecurity in food-producing regions and the withdrawal of the monetary authorities from quasi-fiscal interventions in the agricultural sector. The apex bank has ceded this function to relevant agencies, since the assumption of Olayemi Cardoso as the apex bank Governor. While crop production, which is responsible for c.92% of agricultural output has recorded slower growth outturns since 2022, the livestock sector has remained in a recession since 2023. We expect the agricultural sector to grow by 1.29% y/y in 2024 and 1.19% y/y in 2025. Thus, contribution to overall growth is expected to remain at 0.3% in 2025 (2024: 0.3%).

**Inflation:**

In our H2'24 outlook, we opined that while we anticipated a moderation in headline inflation, there were subtle pressure points from looming subsequent removal episodes. While inflation decelerated in July and August, that key risk materialized in September. In September, PMS prices rose by 24% m/m to ₦1,030/litre, the largest m/m increase since June 2023. This adjustment led to higher year-on-year increases in food and core inflation. Two months later, PMS prices fell by 13% m/m to ₦1,025/litre in November (October: ₦1,180/litre), the first organic fall in PMS prices post-subsidy removal.

On In Q1'24, food inflation surged due to the demand shocks in the commodity markets. Going into 2025, we still see subtle pressure points from high external demand for domestic farm produce due to regional bulk off-takers, which take advantage of cheap Nigerian farm exports. Based on the high base from the prior year, we see inflation moderating through Q1'25 and Q4'25, and higher outturns in Q2'25 – Q3'25. Thus, under our baseline scenario, we expect headline inflation to rise from 33.19% y/y in 2024 to 33.95% y/y in 2025.

**Currency:**

The currency recorded snap appreciations in Q1'24 and Q4'24 respectively. While the appreciation in both quarters was driven by attractive money market rates and cheap currency valuations, the rally in Q4'24 was supported by the \$2.2 billion Eurobond issuance and the introduction of the Electronic Foreign Exchange Matching System (EFEMS), which improved transparency in the Nigerian Foreign Exchange Market (NFEM).

**Currency (contd.)**

In 2024, Nigeria recorded a net foreign portfolio inflow of \$3.1 billion (2023: \$0.5 billion), lured by the carry trade appeal of local currency fixed-income assets. With yields on Open Market Operations (OMO) instruments averaging 30% since the end of Q3 '24, we have observed increased foreign portfolio inflows, taking advantage of these high yields. Should the apex bank continue to offer juicy yields, Nigeria could see more foreign portfolio activity, especially as global central banks cut interest rates.

We retain our prognosis that Naira may continue to remain undervalued in 2025 without adequate catalysts. Thus, we believe the apex bank could retain a tight monetary policy regime, while anticipating significant boosts from oil FX inflows. While energy subsidies are no longer in the picture, we need to see tangible accretion to the external reserves from higher net oil exports and based on this we have developed a fair value estimate to ₦1,653/\$ in 2025.

**Monetary Policy:**

In 2024, the apex bank delivered its highest benchmark rate adjustments since the introduction of the Monetary Policy Rate as an anchor in 2006. The Monetary Policy Committee (MPC) raised the benchmark interest rate by 8.75 ppts y/y to 27.5%. In addition, the Cash Reserve Ratio was raised by 17.5ppts y/y to 50%. The asymmetric corridor around the MPR was adjusted from +100/-300bps in 2023 to +500/-100 bps in 2024, which effectively raised the Standing Deposit Facility rate by 10.75 ppts y/y to 26.5% (2023: 15.75%) and the Standing Lending Facility rate by 12.50 ppts y/y to 32.25% (2023: 19.75%).

The apex bank worked on the transmission mechanism of its rate hikes by removing caps on interest-bearing deposits at the SDF window, luring deposits from banks and paving way for the uptick in money market yields. In addition, The Apex bank mandated banks to offload foreign currency holdings more than their shareholders' funds, while kickstarting a 2-year recapitalization exercise to prop up the share capital of banks. The apex bank also utilized the Open Markets Operations (OMO) tool in mopping up excess liquidity and attracting foreign portfolio investments. Should the apex bank retain its data-driven approach to rate decisions, we believe the apex bank's inflation target for 2025 could drive its rate decisions. In 2024, the apex bank consistently raised interest rates despite the slight moderation witnessed in Q3'24, as inflation was far above its 21% target for the year. While the bank is yet to communicate its inflation target for 2025, we do not see inflation moderating to 20% levels, despite the moderations we envisage in Q1'25 (and possibly Q4'25) due to the huge disparity between core inflation (Nov'24: 28% y/y) and food inflation (Dec'24: 39% y/y). Without significant improvement in agricultural output and amid pent-up external demand for Nigerian agricultural produce, inflation could remain sticky and delay the expected pivot. Thus, we believe the apex bank could raise the benchmark rate by 200bps cumulatively to 29.5% in 2025.

**EQUITIES MARKET**

The Fund is a passively managed fund that tracks the NGX Industrial Index, which constitutes the 10 most capitalized stocks within the Industrial Sector listed on the Nigerian Stock Exchange. Hence our outlook for the Fund will be hinged on our overall outlook for the Equities Market and specifically, the Industrial sector.

**Review and Outlook**

The Nigerian bourse experienced a remarkable 2024, delivering robust growth (+37.7% y/y), amidst a challenging macroeconomic environment, characterized by heightened interest rates, persistent inflation, and a volatile but adverse exchange rate. The year started on an impressive note, as the ASI gained 35.3% m/m in January and crossed the 100,000 points mark, marking a positive start to the year. Following the strong start, the market was mixed throughout the year. For specifics; the market performed positively in February (0.83% m/m, March (2.52% m/m), May (1.09% m/m), June (0.76% m/m), September (2.05% m/m), and December (5.56% m/m), while a significant decline of -6.06% was observed in April, largely as a result of the announcement of the 70% tax levy imposed on FX revaluation gains of the banks, and negative sentiments for stocks in the real sector, following the anticipated impact of elevated interest rates on earnings performance.

**Review and Outlook (contd.)**

In terms of market activities, trading volumes remained volatile throughout the year, with most traded average volume and value for the year 2024 happening in Jan, were ₦14 billion worth of stocks for an average of 876 million units were traded. Meanwhile, the least average value was recorded in July, and the least volume in October at 381 million units. Local investors continued to drive market activity, accounting for about 83% of (₦3.73 trillion) transactions, although this represents a slight decrease from their 90.07% (₦2.64 trillion) share during the same period in 2023. Conversely, foreign investor participation showed marked improvement in 2024, with total foreign transactions reaching ₦344.34 billion, representing 16.65% of total market transactions. This represents a substantial 181% increase from ₦122.55 billion recorded in the comparable period of 2023. Our outlook for 2025 is cautiously optimistic, with key drivers being corporate earnings recovery, bank recapitalization, and potential new listings, which could boost market liquidity and investor confidence. However, downside risks such as persistent inflation, currency depreciation, and tight monetary policy may limit significant market appreciation. Overall, selective opportunities appear in fundamentally sound stocks, particularly in banking, telecoms, and agricultural sectors.

**INDUSTRIAL SECTOR****Review and Outlook**

The Nigerian Industrial Goods sector experienced a mixed performance in Q1 2024, with the cement, real estate, and construction sub-sectors facing divergent demand dynamics and operational challenges. Historically, the public sector has played a pivotal role in driving growth within the construction sector, with the federal government prioritizing infrastructure development in response to significant infrastructure deficits. In the 2024 fiscal budget, substantial allocations were earmarked for road construction, railway expansion, and other key infrastructure projects. However, the pace of project execution slowed in Q1 2024, likely due to project delays and rising input costs, resulting in a 2.14% decline in sector growth.

Despite the challenges, Nigeria's cement producers demonstrated strong top-line growth, primarily driven by higher cement prices. However, foreign exchange (FX) losses remained a significant drag on profitability, negatively impacting earnings. The three major cement players recorded a combined ₦143.1 billion in FX losses for the 9M 2024 period. Operating expenses surged to ₦763.2 billion, reflecting a 452% increase across the industry, largely due to rising diesel prices, which inflated haulage costs. As a result, bottom-line performance for cement companies was relatively subdued.

Market demand for cement continues to be supported by the government's focus on infrastructure development, especially under the current administration. Key initiatives like the Renewed Hope Infrastructure Development Fund (RHIDF) and the Infrastructure Support Fund (ISF) have played a crucial role in stimulating construction activities across the country. However, challenges in capital expenditure (capex) execution persist. As of August 2024, capex implementation stood at just 34%, a notable decline from 61% in the same period of 2023. This underperformance underscores the persistent issues surrounding fund disbursement and project execution, which could impede the full realization of government infrastructure initiatives.

Looking ahead to the 2025 fiscal year, the Nigerian government has proposed a ₦47.9 trillion expenditure budget, a 36.6% increase over the 2024 allocation. This underscores the administration's commitment to fostering economic growth, with infrastructure development at the forefront. A key component of the 2025 budget is the ₦16.48 trillion allocated to capital expenditure, representing 34.41% of the total budget, and an 11.24% increase from the previous year. This boost in capex is expected to drive construction activity, providing further support to the cement industry and related sectors.

However, the fiscal environment also presents significant challenges. The rising allocations for debt servicing and recurrent expenditure pose substantial risks to the effective execution of capital projects. Debt servicing now accounts for 33.02% of the total budget, reflecting a sharp 91.14% increase, underscoring the growing burden of Nigeria's debt obligations. With such a large portion of the budget dedicated to debt servicing, there are concerns that the funds available for capital projects could be constrained, potentially delaying or even halting key infrastructure initiatives. This, in turn, could dampen public sector demand for construction materials, particularly cement. Additionally, non-debt recurrent expenditure has grown by 26.12% year-on-year, now representing 29.67% of the budget. This increase is largely attributed to the implementation of the new minimum wage and rising operational costs, further tightening the fiscal landscape.

In summary, while the 2025 budget demonstrates a strong commitment to infrastructure development, its success will hinge on the government's ability to navigate fiscal pressures and ensure the timely execution of capital projects. For the cement sector, the outlook remains cautiously optimistic, contingent upon the efficient allocation and utilization of capex, as well as the effective management of fiscal challenges.

#### **AUDITORS**

Deloitte, having satisfied the relevant corporate rules on their tenure in office have indicated their willingness to continue in office as auditors to the Fund. Therefore, the auditor will be re-appointed by the Fund Manager and Trustees of the Fund.

BY ORDER OF THE BOARD OF DIRECTORS OF THE FUND MANAGER

**TRUSTEE'S REPORT**

The Trustees present their report on the affairs of the **Vetiva Industrials Exchange Traded Fund** ("the Fund"), together with the audited financial statements for the year ended 31 December 2024.

**Principal Activity:**

The Fund was registered under the collective Investment Scheme by the Securities and Exchange Commission in accordance with the provisions of Section 160 of the Investment and Securities Act (2007). The Fund was designed to replicate the price and yield performance of the NSE Industrial Index as far as is practicable, by holding a portfolio of securities that substantially represents all of the component securities of the NSE Industrial Index in the same weighting as the NSE Industrial Index as specified in Clause 14.1 of the Trust Deed dated 7 July 2015.

The Fund is listed on the floor of the Nigerian Stock Exchange and maintains its assets separate from the assets of the manager. The Scheme has been administered in accordance with provisions of the Investment and Securities Act (2007) and the Fund's Trust Deed.

**Results:**

The results for the year are extracted from the financial records prepared by the Fund Manager and duly audited in accordance with the provision of section 169(2) of the Investment and Securities Act of 2007.

The Net Asset Value of the Fund as at 31 December 2024 is as follows;

In thousands of Naira	31-Dec-24	31-Dec-23
Net Assets Value	<u>64,134,685</u>	<u>283,733,755</u>

The operating result for the year ended 31 December 2024, is as follows;

In thousands of Naira	31-Dec-24	31-Dec-23
Profit for the year	<u>11,260,168</u>	<u>5,480,557</u>

**Directors' and related parties' interest in the units of the Fund:**

None of the Directors of Vetiva Fund Managers Limited held any direct or in direct beneficial interest in the units of the Fund as at 31 December 2024.

None of the directors of UTL Trust Management Services Limited has any direct or in direct beneficial interest in the units of the Fund as at 31 December 2024.

**Olufunke Aiyepolu (Mrs.)**

FRC/2013/PRO/DIR/003/00000003285

UTL Trust Management Services Limited

22 April 2025

**Statement of Trustees' responsibilities**

The Trustees' responsibilities to the Fund are as follows:

- To ensure that the basis on which the sale, issue repurchase or cancellation, as case may be, of participatory interests effected by or on behalf of the Fund is carried out in accordance with the investment and Securities Act, SEC Rules and Regulations and the Trust Deed.
- To ensure that the selling or repurchase price or participatory interest is calculated in accordance with the Investment and Securities Act, SEC Rules and Regulations and the Trust Deed.
- To carry out the instructions of the Manager unless they are inconsistent with the Investment and Securities Act, any applicable law or the Trust Deed.
- To verify that the income accruals of the Fund are applied in accordance with the Investments and Securities Act, SEC Rules and Regulations and the Trust Deed.
- To verify that in transactions involving the underlying portfolio any consideration is remitted to it within time limits which are acceptable market practice in the context of a particular transaction.
- To enquire into and prepare a report on the administration of the Fund by the Manager during each annual accounting period in which it shall be stated whether the Fund has been administered in accordance with the provisions of the Investment and Securities Act, Custody Agreement and Trust Deed.
- To state the reason for non-compliance and outline the steps taken by the Manager to rectify the situation where the Manager does not comply with the limitations and provisions referred to in the Trust Deed.
- To send reports on the administration of the Fund to the Commission and to the Manager in good time to enable the Manager include a copy of the report in its annual report of the Fund.
- To ensure that there is legal separation of underlying portfolio and that the legal entitlement of investors to such underlying portfolio is assured.
- To ensure that the underlying portfolio are properly safeguarded and administered in accordance with relevant laws of the Commission.
- Whenever it becomes necessary for the Trustee to enforce the terms and condition of the Trust Deed, the Trustee shall do so, within ten (10) working days and shall inform the Commission not later than ten (10) working days after the breach.
- To ascertain that the monthly and other periodic returns/reports relating to the Fund are sent by the manager to the Commission.
- To monitor the register of the holders.
- To generally monitor the activities of the Manager on behalf of and in the interest of the holders.
- To take all steps and execute all documents which are necessary to secure acquisition or disposal properly made by the Manager in accordance with the Trust Deed and the Custody Agreement.

**CERTIFICATION OF MANAGEMENT'S ASSESSMENT  
OF INTERNAL CONTROL OVER FINANCIAL REPORTING**

To comply with the provisions of Section 1.1 of SEC Guidance on Implementation of Sections 60-63 of Investments and Securities Act 2007, I hereby make the following statements regarding the Internal Controls of **Vetiva Industrial Exchange Traded Fund** for the year ended 31 December 2024.

I, Oyelade Eigbe, certify that:

1. I have reviewed this management assessment on internal control over financial reporting of **Vetiva Industrial Exchange Traded Fund**

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the Fund as of, and for, the periods presented in this report;

4. The Fund's other certifying officer and I:

a) are responsible for establishing and maintaining internal controls;

b) have designed such internal controls and procedures, or caused such internal controls and procedures to be designed under our supervision, to ensure that material information relating to the Fund, is made known to us, particularly during the period in which this report is being prepared;

c) have designed such internal control system, or caused such internal control system to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

d) have evaluated the effectiveness of the Fund's internal controls and procedures as of a date within 60 days prior to the report and presented in this report our conclusions about the effectiveness of the internal controls and procedures, as of the end of the period covered by this report based on such evaluation.

5. The Fund's other certifying officer and I have disclosed, based on our most recent evaluation of internal control system, to the Fund's Auditors, the Audit Committee and the Fund's board of directors (or persons performing the equivalent functions):

a) All significant deficiencies and material weaknesses in the design or operation of the internal control system which are reasonably likely to adversely affect the Fund's ability to record, process, summarize and report financial information; and

b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the Fund's internal control system.

6. The Fund's other certifying officer(s) and I have identified, in the report whether or not there were significant changes in internal controls or other facts that could significantly affect internal controls subsequent to the date of their evaluation including any corrective actions with regard to significant deficiencies and material weaknesses.

**CERTIFICATION OF MANAGEMENT'S ASSESSMENT  
OF INTERNAL CONTROL OVER FINANCIAL REPORTING**

To comply with the provisions of Section 1.1 of SEC Guidance on Implementation of Sections 60-63 of Investments and Securities Act 2007, I hereby make the following statements regarding the Internal Controls of **Vetiva Industrial Exchange Traded Fund** for the year ended 31 December 2024.

I, Ayodeji Oshin, certify that:

1. I have reviewed this management assessment on internal control over financial reporting of **Vetiva Industrial Exchange Traded Fund**:
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the Fund as of, and for, the periods presented in this report;
4. The Fund's other certifying officer and I:
  - a) are responsible for establishing and maintaining internal controls;
  - b) have designed such internal controls and procedures, or caused such internal controls and procedures to be designed under our supervision, to ensure that material information relating to the Fund, is made known to us, particularly during the period in which this report is being prepared;
  - c) have designed such internal control system, or caused such internal control system to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - d) have evaluated the effectiveness of the Fund's internal controls and procedures as of a date within 60 days prior to the report and presented in this report our conclusions about the effectiveness of the internal controls and procedures, as of the end of the period covered by this report based on such evaluation.
5. The Fund's other certifying officer and I have disclosed, based on our most recent evaluation of internal control system, to the Fund's Auditors, the Audit Committee and the Fund's board of directors (or persons performing the equivalent functions):
  - a) All significant deficiencies and material weaknesses in the design or operation of the internal control system which are reasonably likely to adversely affect the Fund's ability to record, process, summarize and report financial information; and
  - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the Fund's internal control system.
6. The Fund's other certifying officer(s) and I have identified, in the report whether or not there were significant changes in internal controls or other facts that could significantly affect internal controls subsequent to the date of their evaluation including any corrective actions with regard to significant deficiencies and material weaknesses.

## INDEPENDENT AUDITOR'S REPORT

### To the Shareholders of Vetiva Industrial Exchange Traded Fund

### Report on the Audit of the Financial Statements

#### Opinion

We have audited the financial statements of **Vetiva Industrial Exchange Traded Fund** set out on pages 19 to 45, which comprise the statement of financial position as at 31 December 2024, the statement of profit or loss and other comprehensive income, the statement of changes in net assets attributable to Unitholders, the statement of cash flow for the year then ended, and the notes to the financial statements including material accounting policy information.

In our opinion, the Financial Statements give a true and fair view of the financial position of **Vetiva Industrial Exchange Traded Fund** as at 31 December 2024, and its financial performance and cash flows for the year then ended in accordance with IFRS Accounting Standards, the Companies and Allied Matters Act 2020, Financial Reporting Council of Nigeria (Amendment) Act 2023, and the Investment and Securities Act, 2025.

#### Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Vetiva Industrial Exchange Traded Fund in accordance with the requirements of the International Ethics Standards Board for Accountants' (IESBA) International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA code) and other independence requirements applicable to performing audits of Financial Statements in Nigeria. We have fulfilled our other ethical responsibilities in accordance with the IESBA Code and other ethical requirements that are relevant to our audit of Financial Statements in Nigeria.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Other Information

The Fund manager is responsible for the other information. The other information comprises the information included in the document titled "Vetiva Industrial Exchange Traded Fund Annual Financial Statements for the year ended 31 December 2024", which includes the Statement of Fund Manager's Responsibility, Fund Managers Report, Management Assessment of Internal Control over Financial Reporting (ICFR) and Other National Disclosures as required by Companies and Allied Matters Act 2020 and the Financial Reporting Council of Nigeria (Amendment) Act 2023 which we obtained prior to the date of this report. The other information does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not and will not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements, or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed on the other information obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

### **Responsibilities of the Funds Manager for the Financial Statements**

The Fund Manager are responsible for the preparation and fair presentation of the financial statements in accordance with IFRS standards as issued by the International Accounting Standards Board, the requirements of the Companies and Allied Matters Act 2020, the Financial Reporting Council of Nigeria (Amendment) Act 2023, the Investment and Securities Act, 2025 and for such internal control as the Fund Manager determine is necessary to enable the preparation of Financial Statements that are free from material misstatement, whether due to fraud or error.

In preparing the Financial Statements, the Fund Manager are responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Funds manager either intend to liquidate the fund or to cease operations, or have no realistic alternative but to do so.

### **Auditor's Responsibilities for the Audit of the Financial Statements**

Our objectives are to obtain reasonable assurance about whether the Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Financial Statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Fund Managers.
- Conclude on the appropriateness of the Fund Manager's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern.

If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the Financial Statements, including the disclosures, and whether the Financial Statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Plan and perform the Fund audit to obtain sufficient appropriate audit evidence regarding the financial information of the entity or business units within the Funds as a basis for forming an opinion on the financial statements. We are responsible for the direction, supervision, and review of the audit work performed for the purposes of the Fund's audit. We remain solely responsible for our audit opinion.

We communicate with the Fund manager regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Fund manager with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

#### **Report on Other Legal and Regulatory Requirements**

In accordance with the Fifth Schedule of Companies and Allied Matters Act 2020 we expressly state that:

- i) We have obtained all the information and explanation which to the best of our knowledge and belief were necessary for the purpose of our audit.
- ii) The Fund's has kept proper books of account, so far as appears from our examination of those books.
- iii) The Fund's financial position and its statement of profit or loss and other comprehensive income are in agreement with the books of account and returns.

In accordance with the requirements of the Securities and Exchange Commission and the Financial Reporting Council of Nigeria, we also performed a limited assurance engagement and reported on management's assessment of the Entity's internal control over financial reporting as of 31 December 2024. The work performed was done in accordance with FRC Guidance on Assurance Engagement Report on Internal Control over Financial Reporting, and based on the procedures we have performed, and evidence obtained we have issued an unmodified conclusion in our report dated **30 April 2025**. That report is included on pages 16 to 18 of the financial statements.

## Assurance Report of Independent Auditor

### To the Shareholders of Vetiva Industrial Exchange Traded Fund

#### Assurance Report on management's assessment of controls over financial reporting

We have performed a limited assurance engagement in respect of the systems of internal control over financial reporting of **Vetiva Industrial Exchange Traded Fund** as of 31 December, 2024, in accordance with the FRC Guidance on assurance engagement report on Internal Control over Financial Reporting and based on criteria established in the Internal Control — Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) “the ICFR framework”), and the FRC Guidance on Management report on Internal Control over Financial Reporting. **Vetiva Industrial Exchange Traded Fund** management is responsible for maintaining effective internal control over financial reporting and for assessing the effectiveness of internal control over financial reporting including the Management's Report on Internal Control Over Financial Reporting.

We have also audited, in accordance with the International Standards on Auditing, the financial statements of the Fund and our report dated 30 April 2025 where we expressed an unmodified opinion.

#### **Limited Assurance Conclusion**

Based on the procedures we have performed and the evidence that we have obtained, nothing has come to our attention that causes us to believe that the Funds did not establish and maintain an effective system of internal control over financial reporting, as of the specified date, based on the FRC and SEC Guidance on Management report on Internal Control over Financial Reporting.

#### **Definition of internal control over financial reporting**

Internal control over financial reporting is a process designed by, or under the supervision of, the entity's principal executive and principal financial officers, or persons performing similar functions, and effected by the entity's Fund Manager, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A financial Fund's internal control over financial reporting includes those policies and procedures that:

- I. Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Funds;
- II. Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Funds are being made only in accordance with authorizations of management and Fund Manager of the Fund; and
- III. Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Fund's assets that could have a material effect on the financial statements.

### ***Inherent limitations***

Our procedures included the examination of historical evidence of the design and implementation of the Fund's system of internal control over financial reporting for the year ended 31 December 2024. Because of its inherent limitations, internal control over financial reporting may not prevent or detect all misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

### ***Funds Manager and Management's Responsibilities***

The Fund Manager are responsible for ensuring the integrity of the entity's financial controls and reporting.

Management is responsible for establishing and maintaining a system of internal control over financial reporting that provides reasonable assurance regarding the reliability of financial reporting, and the preparation of financial statements for external purposes in accordance with IFRS Accounting Standards as issued by the International Accounting Standards and the ICFR framework.

Section 7(2f) of the Financial Reporting Act 2011 (As amended) further requires that management perform an assessment of internal controls, including information system controls. Management is responsible for maintaining evidential matters, including documentation, to provide reasonable support for its assessment of internal control over financial reporting.

### ***Our Independence and Quality Control***

We have complied with the independence and other ethical requirements of the Code of Ethics for Professional Accountants issued by the International Ethics Standards Board for Accountants, which is founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality, and professional behavior.

The firm applies the International Standard on Quality Management 1, Quality Management for Firms that Perform Audits or Reviews of Financial Statements, or Other Assurance or Related Services Engagements which requires the firm to design, implement and operate a system of quality management including policies or procedures regarding compliance with ethical requirements, professional standards, and applicable legal and regulatory requirements.

### ***Auditor's Responsibility and Approach***

Our responsibility is to express a limited assurance opinion on the Fund 's internal control over financial reporting based on our Assurance engagement.

We performed our work in accordance with the FRC Guidance on Assurance Engagement Report on Internal Control over Financial Reporting and the International Standard on Assurance Engagements (ISAE) 3000, Assurance Engagements other than the Audits or Reviews of Historical Financial Information (ISAE 3000) revised. That Standard requires that we comply with ethical requirements and plan and perform the limited assurance engagement to obtain limited assurance on whether any matters come to our attention that causes us to believe that the *funds* did not establish and maintain an effective system of internal control over financial reporting in accordance with the ICFR framework.

That Guidance requires that we plan and perform the Assurance engagement and provide a limited assurance report on the entity's internal control over financial reporting based on our assurance engagement.

The procedures performed in a limited assurance engagement vary in nature and timing from, and are less in extent than for, a reasonable assurance engagement. As a result, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had we performed a reasonable assurance engagement. Accordingly, we do not express a reasonable assurance opinion on whether the Funds established and maintained an effective system of internal control over financial reporting.

As prescribed in the Guidance, the procedures we performed included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our engagement also included performing such other procedures as we considered necessary in the circumstances.

We believe the procedures performed provides a basis for our report on the internal control put in place by management over financial reporting.

**Notes to the financial statements**

**For the year ended 31 December 2024**

**1 Reporting entity**

The Vetiva Industrials Exchange Traded Fund ("the Fund") is an open-ended exchange traded Fund that operates in Nigeria. The

The Vetiva Industrial ETF is designed to track the performance of the constituent companies of the NSE Industrial Index and to replicate

**2 Basis of preparation**

**(a) Statement of compliance**

The financial statements have been prepared in accordance with International Financial Reporting Standards and in the

The financial statements were authorized for issue by the Board of Directors of the Fund Manager on 22 April 2025

**(b) Basis of measurement**

The financial statements have been prepared using appropriate accounting policies, supported by reasonable judgements and estimates. The Fund Managers have a reasonable expectation, based on an appropriate assessment of a comprehensive range of factors, that the Fund has adequate resources to continue as going concern for the foreseeable future.

The financial statements have been prepared for the year ended 31 December 2024, except financial instruments measured at fair value through profit or loss, other financial instruments that are initially measured at fair value and subsequently at amortised cost. The Fund applies the accrual method of accounting where all income is recognized when earned and all expenses recognized once incurred.

Historical cost is generally based on the amount of cash and cash equivalent paid or received or fair value of consideration

**(c) Functional and presentation currency**

The financial statements are presented in Naira which is the functional currency of the Fund.

**(d) Reporting period**

The financial statements have been prepared for the year ended 31 December 2024.

**(e) Use of estimates and judgments**

In preparing these financial statements, management has made judgments, estimates and assumptions that affect the

The estimates and underlying assumptions are reviewed on an ongoing basis. Revision to accounting estimates are recognised in the period which the estimates are revised and in any future periods affected.

Information about critical judgments in applying accounting policies that have the most significant effect on the amounts recognised in the financial statements are described in note 5 to the financial statements.

**Notes to the financial statements (cont'd)**  
**For the year ended 31 December 2024****3 Statement of significant accounting policies****3.1 Applicable standards and accounting policies****(a) Financial assets and liabilities****(i) Recognition and Initial recognition**

The fund initially recognises regular-way transactions in financial assets and financial liabilities at fair value through profit or loss (FVTPL) on the trade date, which is the date on which the Fund becomes a party to the contractual provisions of the instrument.

Other financial assets and financial liabilities are recognised on the date on which they are originated.

A financial asset or financial liability is measured initially at fair value plus, for an item not at FVTPL, transaction costs that are directly attributable to its acquisition or issue.

**(ii) Classification and subsequent measurement****Classification of financial assets**

On initial recognition, the Fund classifies financial assets as measured at amortised cost or FVTPL.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- It is held within a business model whose objective is to hold assets to collect contractual cash flow; and
- Its contractual terms give rise on specified dates to cash flows that are SPPI.

All other financial assets of the Fund are measured at FVTPL.

**Business Model Assessment**

In making an assessment of the objective of the business model in which a financial asset is held, the Fund considers all of the relevant information about how the business is managed, including:

- the documented investment strategy and the execution of this strategy in practice. This includes whether the investment strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realizing cash flows through the sale of the assets;
- how the performance of the portfolio is evaluated and reported to the Fund's Management;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- how the investment manager is compensated: e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- the frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

Transfers of financial assets to third parties in transactions that do not qualify for derecognition are not considered sales for this purpose, consistent with the Fund's continuing recognition of the assets.

The Fund has determined that it has two business models:

- Held-to-collect business model: this includes cash and cash equivalents. These financial assets are held to collect contractual cash flow.
- Other business model: this includes the fund's investments in quoted equity investments.

**Assessment whether contractual cash flows are SPPI (Solely payments of principal and interest)**

For the purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as a profit margin.

**Notes to  
For the ;**

**o the financial statements (cont'd)**  
**year ended 31 December 2024**

In assessing whether the contractual cash flows are SPPI, the Fund considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Fund considers:

- contingent events that would change the amount or timing of cash flows;
- leverage features;
- prepayment and extension features;
- terms that limit the Fund's claim to cash flows from specified assets (e.g. non-recourse features); and
- features that modify consideration of the time value of money (e.g. periodical reset of interest rates).

**Reclassification**

Financial assets are not reclassified subsequent to their initial recognition unless the fund were to change its business model for managing financial assets, in which case all affected financial assets would be reclassified on the first day of the first reporting period following the change in the business model.

**Subsequent measurement of financial asset****Financial assets at fair value through profit or loss (FVTPL)**

These assets are subsequently measured at fair value. Net gains and losses including any interest on dividend income and expense and foreign exchange gains and losses are recognised in profit or loss in net income from financial instruments at FVTPL in the statement of comprehensive income. Debt securities, investment in unlisted open-ended investment funds, unlisted private equities and derivative financial instruments are included in this category.

**Financial assets at fair value through Other comprehensive income (FVOCI)**

A financial asset is measured at FVOCI if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Equity investments are included in this category. The Fund has elected to recognise movements in the fair value of equity investments in other comprehensive income, along with the realized gains or losses on disposal of the investments.

**Financial assets at amortised cost**

These assets are subsequently measured at amortised cost using the effective interest method. Interest income is recognised in profit or loss and calculated using the effective interest method, foreign exchange gains and losses are recognised in net foreign exchange loss and impairment is recognised in impairment losses on financial instruments in the statement of comprehensive income. Any gain or loss on derecognition is also recognised in profit or loss. Cash and cash equivalents balances due from brokers and receivables from reverse sale and repurchase agreements are included in this category.

**Financial liabilities- Classification, subsequent measurement and gains and losses**

Financial liabilities are classified as measured at amortised cost or FVTPL.

A financial liability is classified as FVTPL if it is classified as held-for-trading, it is a derivative or it is designated as such, on initial recognition. Financial liabilities at FVTPL are measured at fair value and not gains and losses, including any interest expense, are recognised in profit or loss. Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in profit or loss. Any gain or loss on derecognition is also recognised in profit or loss.

**Notes to the financial statements (cont'd)**  
**For the year ended 31 December 2024****(iii) Financial liabilities at FVTPL:**

- Held for trading: securities sold short and derivative financial instruments.

**(iv) Financial liabilities at amortised cost:**

This includes balances due to fund manager, custodian, trustees, auditors and other counterparties.

**(v) Fair value measurement**

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Fund has access at that date. The fair value of an asset or liability reflects its non-performance risk.

When available, the Fund measures the fair value of an instrument using the quoted price in an active market for that instrument. A market is regarded as active if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

If there is no quoted price in an active market, then the Fund uses valuation techniques that maximise the use of relevant observable inputs and minimise the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction.

The Fund recognises transfers between levels of the fair value hierarchy as at the end of the reporting period during which the change has occurred.

**Amortised cost measurement**

The 'amortised cost' of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured on initial recognition minus the principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount and for financial assets, adjusted for any loss allowance.

**(vi) Impairment of financial assets**

The Fund recognises loss allowance for ECLs on financial assets measured at amortised cost. The Fund measures loss allowance at an amount equal to lifetime ECLs, except for the following, which are measured at 12-month ECLs:

- financial assets that are determined to have low credit risk at The reporting date: and
- other financial assets for which credit risk (i.e. the risk of default occurring over the expected life of the asset) has not

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Fund considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Fund's historical experience and informed credit assessment and including forward looking information. The Fund assumes that the credit risk on a financial asset has increased significantly if it is more than 30 days past due.

The Fund considers a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to the Fund in full without recourse by the Fund to actions such as
- the financial asset is more than 90 days past due.

The Fund considers a financial asset to have a low credit risk when the credit rating of the counterparty is equivalent to the

Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument.

**Notes to the financial statements (cont'd)****For the year ended 31 December 2024**

12-month ECLs are the portion of ECLs that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

The maximum period considered when estimating ECLs is the maximum contractual period over which the fund is exposed to credit risk.

**Measurement of ECLs**

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Fund expects to receive).

ECLs are discounted at the effective interest rate of the financial asset.

**Credit-impaired financial assets**

At each reporting date, the Fund assesses whether financial assets carried at amortised cost are credit-impaired. A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred. Evidence that a financial asset is credit-impaired includes the following observable data:

- a significant financial difficulty of the borrower or issuer;
- a breach, of contract such as a default or before more than 90 days past due; or
- it is probable that the borrower will enter bankruptcy or other financial reorganisation.

**Presentation of allowance for ECLs in the statement of financial position**

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets. For financial assets measured at OCI, loss allowance is presented in other comprehensive income.

**Write-off**

The gross carrying amount of a financial asset is written off when the Fund has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof.

**(vii) Derecognition****Financial assets**

The Fund derecognises regular-way sales of financial asset using trade date accounting. A financial asset is derecognised when the contractual rights to the cash flows from the asset expire, or the Fund transfers the rights to receive the contractual cash flows in a transaction in which substantially all the risks and rewards of ownership of the financial asset are transferred, or in which the Fund neither transfers nor retains substantially all of the risk and rewards of ownership and does not retain control of the financial asset.

On derecognition of a financial asset, the difference between the carrying amount of the assets (or the carrying amount allocated to the portion of the asset derecognised), and the consideration received (including any new asset obtained less any new liability assumed) is recognised in profit or loss. Any interest or in such transferred financial assets that is created or retained by the Fund is recognised as a separate asset or liability.

The Fund enters into transactions whereby it transfers assets recognised on its statement of financial position but retains either all or substantially all of the risks and rewards of the transferred assets or a portion of them. If all or substantially all risks and rewards are retained, then the transferred assets are not derecognised. Transfer of assets with retention of all or substantially all risks and rewards include securities lending and repurchase transactions.

The Fund derecognises a financial liability when its contractual obligations are discharged or cancelled or expire. On derecognition of a financial liability, the difference between the carrying amount extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognised in profit or loss.

**Notes to the financial statements (cont'd)****For the year ended 31 December 2024**

The Fund derecognises a derivative only when it meets the derecognition criteria for both financial assets and financial

**(viii) Offsetting**

Financial assets and liabilities are set off and the net amount presented in the statement of financial position when, and only when, the Fund has a legal right to set off the amounts and intends either to settle on a net basis or to realise the asset and settle the liability simultaneously.

Income and expenses are presented on a net basis for gains and losses from financial instruments at FVTPL and foreign exchange gains and losses.

**(ix) Specific instruments****Cash and cash equivalents**

Cash and cash equivalents comprise deposits with banks and highly liquid financial assets with maturities of three months or less from the date of acquisition that are subject to an insignificant risk of changes in their fair value and are used by the Fund in the management of short-term commitments, other than cash collateral provided in respect of derivatives and securities borrowing transactions.

**Accounts receivable**

Account receivable comprises dividend income earned but not yet received by the Fund. It also comprises other receivables and prepaid expenses.

**Accounts payable**

Accounts payable comprises amount due to trustees, custodians, fund manager and other counterparties as at end of the year.

**(b) Interest income and interest expense**

Interest income and expense, including interest income from non-derivative financial assets at fair value through profit or loss, are recognised in profit or loss, using the effective interest method excluding transactions cost since they are expenses when incurred.

**(c) Dividend income**

Dividend income is recognised in profit or loss on the date on which the right to receive payment is established. For quoted equity securities, this is usually the ex-dividend date. Dividend income from equity securities are recognised in profit or loss as a separate line item.

**(d) Fair value gains/losses on financial instruments**

Net gain from financial instruments at fair value through profit or loss includes all realised and unrealised fair value changes and foreign exchange differences but excludes interest and dividend income.

The realised gain from financial instruments at fair value through profit or loss is computed as the difference between the carrying amount of a financial instrument at the beginning of the reporting period, or the transaction price if it was purchased in the current reporting period, and its sale or settlement price while the unrealised gain is calculated as the difference between the carrying amount of a financial instrument at the beginning period, or the transaction price if it was purchased in the current reporting period, and its fair value at the end of the period.

**(e) Expenses**

Expenses comprising management fees, custodian fees, registrar fees, trustee's fees, auditor's fees, and other expenses are recognised over the period in which the services are rendered, in accordance with the substance of the Trust Deed and relevant agreements.

**Notes to the financial statements (cont'd)****For the year ended 31 December 2024****(f) Transaction costs**

Transaction costs are costs incurred to acquire financial assets or; liabilities. They include the bid-ask spread, fees and commissions paid to agents, advisers, brokers and dealers, levies by regulatory agencies and securities exchanges.

Transaction costs incurred on financial assets or liabilities other than those designated at fair value through profit or loss are capitalised as part of the carrying amount of the financial asset or financial liability on initial recognition, and amortised over the life of the financial instrument.

Transaction costs incurred for financial assets and liabilities classified as fair value through profit or loss are expensed when incurred.

**(g) Income Tax**

The Fund is exempt from paying income taxes under the current system of taxation in Nigeria. However, dividend income and interest income on fixed interest and dividend income received by the Fund are subject to withholding tax in Nigeria and represent final income tax on the profit for the period. During the period, the withholding tax rate was 10%.

**(h) Capital****(i) Equity attributable to unitholders**

The Fund classifies financial instruments issued as financial liabilities or equity instruments in accordance with the substance of the contractual terms of the instruments.

The Fund's units in issue are financial instruments issued by the Fund and on liquidation of the Fund, the Unitholders are entitled to the residual net assets. They rank pari passu in all material respects and have identical terms and conditions. The units provide the investors with the right to require redemption for cash at a value proportionate to the investor's share in the Fund's net assets at each redemption date and also in the event of the Fund's liquidation.

A puttable financial instrument that includes a contractual obligation for the Fund to repurchase or redeem that instrument for cash or another financial asset is classified as equity if it meets all the of the following conditions:

- It entitles the holder to a pro rata share of the Fund's net assets in the event of the Fund's liquidation;
- It is in the class of instruments that is subordinate to all other classes of assets of instruments;
- All financial instruments in the class of instruments that is subordinate to all other classes of instruments have identical features;
- Apart from the contractual obligation for the Fund to repurchase or redeem the instrument for cash or another financial assets, the instruments does not include any other features that would require classification as a liability; and
- The total expected cash flows attributable to the instruments over its life are based substantially on the profit or loss, the change in the recognised net assets or the change in the fair value of the

The Fund's units meet these conditions and are classified as equity.

**(ii) Repurchase of units**

When units recognised as equity are redeemed, the par value of the units is presented as a deduction from capital. Any premium or discount to par value is recognised in retained earnings.

**Notes to the financial statements (cont'd)****For the year ended 31 December 2024****(i) Earnings per unit**

The Fund presents basic and diluted earnings per unit data for its units. Basic earnings per unit is calculated by dividing the profit or loss attributable to unit holders of the Fund by the total number of units outstanding during the period. Diluted earnings per unit is determined by adjusting the profit or loss attributable to unitholders and the weighted number of units outstanding at the end of the period for the effects of all dilutive potential ordinary units.

**(j) Net asset per unit**

The Fund also presents the net asset per units for its unitholders. Net asset per unit is calculated by dividing the total value of the fund by the number of outstanding units during the period.

**(k) Contingent liabilities**

A contingent liability is a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non- occurrence of one or more uncertain future events not wholly within the control of the Fund. Contingent liabilities are disclosed in the financial statements.

**(l) Provisions**

A provision is recognised if, as a result of a past event, the fund has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability.

A provision for restructuring is recognised when the fund has approved a detailed and formal restructuring plan, and the restructuring either has commenced or has been announced publicly. Future operating costs are not provided for.

A provision for onerous contracts is recognised when the expected benefits to be derived by the fund from a contract are lower than the unavoidable cost of meeting its obligations under the contract. The provision is measured at the present value of the lower of the expected cost of terminating the contract and the expected net cost of continuing with the contract. Before a provision is established, the fund recognizes any impairment loss on the assets associated with that contract.

**Notes to the financial statements (cont'd)****For the year ended 31 December 2024****3.2 New and revised IFRS Accounting Standards in issue but not yet effective**

At the date of authorisation of these financial statements, the Fund has not applied the following new and revised IFRS Accounting Standards that have been issued but are not yet effective.

**(i) Amendments to IAS 21 The Effects of Changes in Foreign Exchange Rates titled Lack of Exchangeability**

The amendments specify how to assess whether a currency is exchangeable, and how to determine the exchange rate when it is not.

The amendments state that a currency is exchangeable into another currency when an entity is able to obtain the other currency within a time frame that allows for a normal administrative delay and through a market or exchange mechanism in which an exchange transaction would create enforceable rights and obligations.

An entity assesses whether a currency is exchangeable into another currency at a measurement date and for a specified purpose. If an entity is able to obtain no more than an insignificant amount of the other currency at the measurement date for the specified purpose, the currency is not exchangeable into the other currency.

The assessment of whether a currency is exchangeable into another currency depends on an entity's ability to obtain the other currency and not on its intention or decision to do so.

When a currency is not exchangeable into another currency at a measurement date, an entity is required to estimate the spot exchange rate at that date. An entity's objective in estimating the spot exchange rate is to reflect the rate at which an orderly exchange transaction would take place at the measurement date between market participants under prevailing economic conditions.

The amendments do not specify how an entity estimates the spot exchange rate to meet that objective. An entity can use an observable exchange rate without adjustment or another estimation technique. Examples of an observable exchange rate include:

- a spot exchange rate for a purpose other than that for which an entity assesses exchangeability
- the first exchange rate at which an entity is able to obtain the other currency for the specified purpose after exchangeability of the currency is restored (first subsequent exchange rate).

An entity using another estimation technique may use any observable exchange rate—including rates from exchange transactions in markets or exchange mechanisms that do not create enforceable rights and obligations—and adjust that rate, as necessary, to meet the objective as set out above.

When an entity estimates a spot exchange rate because a currency is not exchangeable into another currency, the entity is required to disclose information that enables users of its financial statements to understand how the currency not being exchangeable into the other currency affects, or is expected to affect, the entity's financial performance, financial position and cash flows.

The amendments add a new appendix as an integral part of IAS 21. The appendix includes application guidance on the requirements introduced by the amendments. The amendments also add new Illustrative Examples accompanying IAS 21, which illustrate how an entity might apply some of the requirements in hypothetical situations based on the limited facts presented.

In addition, the IASB made consequential amendments to IFRS 1 to align with and refer to the revised IAS 21 for assessing exchangeability.

The amendments are effective for annual reporting periods beginning on or after 1 January 2025, with earlier application permitted. An entity is not permitted to apply the amendments retrospectively. Instead, an entity is required to apply the specific transition provisions included in the amendments.

The Fund Manager that the application of these amendments will not have any material impact on the Fund's financial statements in future periods.

**Notes to the financial statements (cont'd)****For the year ended 31 December 2024****(ii) IFRS 18 Presentation and Disclosures in Financial Statements**

IFRS 18 replaces IAS 1, carrying forward many of the requirements in IAS 1 unchanged and complementing them with new requirements. In addition, some IAS 1 paragraphs have been moved to IAS 8 and IFRS 7. Furthermore, the IASB has made minor amendments to IAS 7 and IAS 33 Earnings per Share.

IFRS 18 introduces new requirements to:

- present specified categories and defined subtotals in the statement of profit or loss
- provide disclosures on management-defined performance measures (MPMs) in the notes to the financial statements
- improve aggregation and disaggregation.

An entity is required to apply IFRS 18 for annual reporting periods beginning on or after 1 January 2027, with earlier application permitted. The amendments to IAS 7 and IAS 33, as well as the revised IAS 8 and IFRS 7, become effective when an entity applies IFRS 18. IFRS 18 requires retrospective application with specific transition provisions.

The Fund Manager that the application of these amendments will not have any material impact on the Fund's financial statements in future periods.

**(iii) IFRS 19 Subsidiaries without Public Accountability: Disclosures**

IFRS 19 is optional for subsidiaries that are eligible and sets out the disclosure requirements for subsidiaries that elect to apply it.

An entity is only permitted to apply IFRS 19 if, at the end of the reporting period:

- it is a subsidiary (this includes an intermediate parent)
- it does not have public accountability, and
- its ultimate or any intermediate parent produces consolidated financial statements available for public use that comply with IFRS Accounting Standards.

A subsidiary has public accountability if:

- its debt or equity instruments are traded in a public market or it is in the process of issuing such instruments for trading in a public market (a domestic or foreign stock exchange or an over-the-counter market, including local and regional markets), or
- it holds assets in a fiduciary capacity for a broad group of outsiders as one of its primary businesses (for example, banks, credit unions, insurance entities, securities brokers/dealers, mutual funds and investment banks often meet this second criterion).

Eligible entities can apply IFRS 19 in their consolidated, separate or individual financial statements. An eligible intermediate parent that does not apply IFRS 19 in its consolidated financial statement may do so in its separate financial statements.

The new standard is effective for reporting periods beginning on or after 1 January 2027 with earlier application permitted.

If an entity elects to apply IFRS 19 for a reporting period earlier than the reporting period in which it first applies IFRS 18, it is required to apply a modified set of disclosure requirements set out in an appendix to IFRS 19. If an entity elects to apply IFRS 19 for an annual reporting period before it applied the amendments to IAS 21, it is not required to apply the disclosure requirements in IFRS 19 with regard to Lack of Exchangeability.

The Fund Manager that the application of these amendments will not have any material impact on the Fund's financial statements in future periods.

**Notes to the financial statements (cont'd)****For the year ended 31 December 2024****4 Financial risk management and fair value disclosures****Introduction and overview**

The Fund is exposed to the following risks from financial instrument:

- Market risk
- Credit risk
- Liquidity risk
- Concentration risk

**Risk management framework**

The Fund Manager has a discretionary authority to manage the asset in line with the Fund's investment objectives in compliance with target asset allocation and composition of the portfolio is monitored by the investment committee on a regular basis.

In instances where the portfolio has deviated from the target asset composition the Fund Manager is obliged to take actions to rebalance the portfolio in line with established targets within the prescribed time limits.

The Fund uses different methods to measure the various types of risks and the means of managing them are documented below:

**a. Market risk**

Market risk is the risk that changes in market prices - such as interest rates, equity prices, foreign exchange rates and credit spreads (not relating to changes in the obligor's/issuers credit standing) - will affect the Fund's income or the fair value of its holding of financial instruments. The Fund's strategy for the management of market risk is driven by the Fund's investment objective. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return. The Fund's market risk is affected by changes in actual market prices. The riskmanagement strategy has not changed due to the COVID-19 coronavirus pandemic.

**(i) Foreign exchange risk**

The Fund does not have transactions in any other currency except the Fund's functional currency in Naira.

Hence, it is not exposed to foreign exchange risk.

**(ii) Interest rate risk**

Interest rate risk arises from the possibility that changes in interest rates will affect future cash flows or fair values of financial instruments. Interest rate risk arises when the fund invests in interest-bearing financial instruments. The Fund's interest rate risk is concentrated in its investment in bonds and treasury bills. The table below summarizes the Fund's interest rate exposure at the end of the period and the impact of fluctuation in interest rates on the Fund's profit and net asset value.

**Notes to the financial statements (cont'd)****For the year ended 31 December 2024****In Naira**

- 2%	(1,288,651)	(5,658,582)
- 5%	(3,221,628)	#####

**b. Credit risk**

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment it

The Fund is subject to credit risk from the following:

- its holdings in money market placements
- current account balances with local banks
- investments in FGN bonds and treasury bills
- dividend receivable

**Notes to the financial statements (cont'd)****For the year ended 31 December 2024**

The Fund limits this exposure to credit loss by placing funds with banks and investing in securities issued by entities with high credit quality. As at 31 December 2024, the Fund did not have placements with banks (31 December 2023: Nil)

The Fund's cash is held with the custodian, UBA Global Investor Services, a subsidiary of United Bank for Africa PLC which is rated 'Aa-' (2021: 'Aa-') based on Augusto & Co ratings. Outstanding dividends are due from highly rated companies whose stocks are presently trading on the floor of the Nigerian Stock

Exchange ('NSE'). The Exchange ensures that all declared dividends declared are paid.

In line with the Trust Deed, the Fund is not authorized to engage in securities lending.

**c. Liquidity risk**

Liquidity risk is the risk that the Fund will encounter difficulties in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Fund's Trust Deed provides for daily creation and cancellation of units and it is therefore exposed to liquidity risk of meeting unitholders' redemptions. Liquidity risk is managed by investing the Fund's assets in investments that are traded in an active market and can be easily disposed. In addition, the Fund aims to retain sufficient cash and cash equivalent positions to maintain liquidity.

The Fund's investments are considered readily realizable and highly liquid; therefore, the Fund's exposure to liquidity risk is considered minimal. The following were the contractual maturities of financial assets and liabilities at the reporting date. The amounts are gross and undiscounted.

**d. Concentration risk**

Concentration risk refers to any single exposure or group of exposures large enough to cause credit losses which threaten the fund's capital adequacy or ability to maintain its core operations. It is the risk that common factors within a risk type or across risk types cause credit losses or an event occurs within a risk type which results to credit losses.

A breakdown of the Fund's investment portfolio as at 31 December 2024 is shown in note 15.

**5 Uses of estimates and judgments****(a) Critical accounting judgment in applying the Fund's accounting policies****(i) Financial asset and liability classification**

The Fund's accounting policies guide scope for assets and liabilities to be designated on inception into different accounting categories in certain circumstances.

- The unitholders interest is classified as equity, as the Fund has determined that it has met the criteria for this designation set out in note 3.1(h).

**(b) Estimates****(i) Valuation of financial instruments**

The Fund's accounting policy on fair value measurement is discussed in note 3.1(a)(v).

The Fund measures fair value using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements:

**Notes to the financial statements (cont'd)***For the year ended 31 December 2024*

Level 1: Quoted market price (unadjusted) in an active market for an identical instrument.

Level 2: Valuation techniques based on observable inputs, either directly; (i.e. as prices) or indirectly (i.e. derived from prices). This category includes instruments valued using quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data.

Level 3: Valuation techniques using significant unobservable inputs. This category includes all instruments for which the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instruments' valuation. This category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

Fair values of financial assets and financial liabilities that are traded in active markets are based on quoted prices or

Assumptions and inputs used in valuation techniques include risk-free and benchmark interest rates, credit spreads and

Availability of observable market prices and model inputs reduces the need for management judgment and estimation

The table below analyses financial instruments measured at fair value at the end of the reporting period by the level in

	<b>8,063,911</b>	<b>7,844,634</b>

**10 Income tax expense**

The Fund is exempt from paying income taxes under the current system of taxation in Nigeria. However, dividend income and interest income on fixed deposits received by the Fund are subject to withholding tax in Nigeria and represent final income tax on the profit for the year. During the year, the withholding tax rate was 10%.

	<b>31-Dec-24</b>	<b>31-Dec-23</b>
Withholding tax on dividend and interest income	1,372,450	990,209
	<b>1,372,450</b>	<b>990,209</b>

**11 Earnings per unit (basic and diluted)**

Loss per unit is calculated by dividing the loss for the year by the number of units as at year end.

	<b>31-Dec-24</b>	<b>31-Dec-23</b>
Profit for the year	<b>5,480,557</b>	<b>5,480,557</b>
Number of units as at year end (see note 18(b)(i))	<b>1,665,860</b>	<b>25,681,216</b>
Earnings per unit (kobo) (basic and diluted)	<b>329</b>	<b>21</b>

The Fund does not have any dilutive potential units. Therefore, basic loss per unit and diluted loss per unit are the same for the Fund.

**Notes to the financial statements (cont'd)****For the year ended 31 December 2024**

- (a) Account receivable represents receivable from the Fund Manager. This relates to excess of expenses charged to the fund, above the regulatory minimum expense ratio which is 5% of net asset value. The fund manager determines this excess charge at the end of the period and reverses the excess expense, while a corresponding receivable is recognized.
